ULTIMAX **The Ultimate Gas Treatment**

01/01/25

“The Ultimate Gas Treatment with the maximum results”

Description

Ultimax ethanol gas conditioner is the latest and greatest scientifically formulated product developed to target problems arising from ethanol in gasoline. Through extended research and studies performed by Baton Rouge Industries already proven additives and conditioners, Ultimax is the most effective gas treatment of its kind on the market today.

Ethanol in gas is creating a condensation and moisture problem that is causing rust corrosion and filter clogging. It also causes the fuel pumps to go out and loss of power in the vehicle. Ultimax has additives that will emulsify condensation and moisture, thereby converting it into a combustible form to eliminate filter clogging and costly downtime.

With 12 Benefits

- Improves fuel economy
- Helps restore engine performance
- Reduces friction in upper cylinder area
- Reduces engine wear in critical areas
- Reduces combustion chamber intake valve and PFI injector deposits
- Provides protection against corrosion of steel, copper and silver metals
- Reduces gum and varnish on carburetors and fuel system parts
- Helps gasoline resist breakdown when exposed to air, oxygen or heat
- Improves immediate & long-term performance
- Inhibits harmful acids and helps increase horsepower
- Kills algae that grows in the fuel
- Fuel stabilizer and helps prevent pre-detonation
- Reduces harmful emissions

SPECIFICATIONS

DIRECTIONS

Viscosity @ 210° F. SUS	34	5 oz. to 24 Gallons
Viscosity @ 100° F. SUS	55	1 Pint to 78 Gallons
Specific Gravity	.874	1 Quart to 156 Gallons
Flash Point	84	1 Gallon to 616 Gallons
Rust Inhibited	Yes	5 Gallons to 3080 Gallons
Anti-Wear Treated	Yes	16 Gallons 9856 Gallons
